EDUCATION

B.E. in CSE

UIT, Barkatullah University

2018 - Present

Bhopal, 8.01 CGPA

High School

Kendriya Vidyalaya

2015 - 09/2017

Indore

PROJECTS

1. Weather Prediction (10/2021) (09/2021)

- Django based web app to perform prediction of weather and retrieve live description of weather for a place. App fetches data from OpenWeatherMap.org API and returns the data to user on frontend while saving it in the database. User can make prediction of rainy weather by filling the form and the app uses the data in database for the prediction. Predict with more than 77% of accuracy.

- [Code](#)
- [Heroku app](#)

2. Party Room (04/2021 - 05/2021)

- Minor Project Django-React based web app to create a room for guests to join with a unique code for each room.
- Guests can play/pause song if Admin gives permissions and can vote to skip a song and if the votes reach up to the mark set by the admin, the song will automatically get skipped.
- Admin can update the room information at any point.
- Used Spotify API to listen songs.

- [Code](#)

3. Titanic Survivors (10/2021)

- MERN based web app to predict the survivor on titanic boat. One can predict whether the person on titanic boat survived or not by filling the form. Used Python Pickle library to deploy the machine learning code on the app.

- [Code](#)
- [Working Video](#)

4. Resume Parser (11/2021 - Present)

- Resume parsing using OCR and NER. Using libraries like pdf2image, SpaCy, py2resparser and much more.

- [Code](#)

WORK EXPERIENCE

Intern at Credicxo Tech. Ltd.

Python Developer

11/2021 - Present

Achievements/Tasks

- Wrote Selenium scripts to scrape data from websites.
- Building resume parser using OCR and NER.
- Learning other Python based libraries as per requirement
